

PROFESSIONAL SUMMARY

Adaptable Computer Science student with a strong foundation in full-stack development and a passion for DevOps and AI/ML. Eager to contribute my technical skills and innovative mindset to the digital payments ecosystem as a Graduate Trainee Engineer at NPST. Proficient in Java, Python, and React, with experience in building scalable systems and optimizing performance.

EDUCATION

Aug 2022 – May 2026

TECHNICAL SKILLS

Programming & Frameworks: Java, Python, JavaScript, Node.js, Express.js
Frontend Technologies: React.js, HTML, CSS
Databases: SQL (MySQL), NoSQL (MongoDB, Firebase)
DevOps & Cloud: Docker, CI/CD, Vercel, Git, REST APIs
R&D and Prototyping: AI/ML, OCR (Tesseract.js), Emerging Technologies

WORK EXPERIENCE

May 2025 – August 2025

RI Equation LLP

- Contributed to the full software development lifecycle, including design, implementation, testing, and deployment in an agile environment.
- Collaborated with cross-functional teams to enhance backend services, ensuring successful code deployment to production.
- Practiced engineering best practices, such as code reviews, unit testing, and technical documentation, to maintain high-quality standards.
- Identified and resolved performance issues, resulting in a significant 25% reduction in API response latency.

PROJECTS

Schollarr: AI-Powered Docs Management System | *React, Node.js, MongoDB, Tesseract.js*

Aug 2024 – Sep 2024

- Developed a secure scholarship management platform with RBAC, automating application workflows.
- Integrated AI-powered OCR for document verification and fraud detection, reducing manual efforts.
- Built a scalable backend with Node.js/Express, including automated notifications and real-time tracking.

QuickBuzz: Real-time Communication Platform | *React.js, WebRTC, Firebase*

Dec 2024 – Present

- Engineered a low-latency communication platform, showcasing skills in building scalable systems for payment processing.
- Implemented robust error handling and peer-to-peer connection management for reliable data transfer.
- Collaborated in an agile process, contributing to high-quality code delivery for new features.

Intelligent Data Analyst Agent (R&D PoC) | *Python, Flask, REST APIs*

Apr 2025 – Present

- Developed a Proof-of-Concept for analyzing unstructured data using third-party AI APIs.
- Built a Python backend to parse various file formats, demonstrating adaptability.
- Designed a responsive React.js frontend, enabling user interaction and data visualization.

ACHIEVEMENTS

Problem Solving
Solved 100+ problems on LeetCode, showcasing strong analytical and problem-solving skills.
