

Rishav Raj

r62599446@gmail.com—linkedin.com/in/rishav-raj-177610262—github.com/rishav-wq

Professional Summary Adaptable and results-driven Computer Science student with a strong foundation in full-stack development, DevOps, and AI/ML. Proven ability to solve complex problems and contribute to real-world projects, with proficiency in Java, Python, Spring Boot, and React. Eager to apply my diverse technical skills across multiple engineering functions to innovate within India's digital payments ecosystem as a Graduate Trainee Engineer at NPST. Education Birla Institute of Technology, Mesra Ranchi, India Bachelor of Technology in Computer Science and Engineering; CGPA: 8.27/10 Aug 2022 – May 2026 Technical Skills Programming & Frameworks: Java, Python, JavaScript, Node.js, Express.js Frontend Technologies: React.js, HTML, CSS Databases: SQL (MySQL), NoSQL (MongoDB, Firebase) DevOps & Cloud: Docker, CI/CD, Vercel, Git, REST APIs R&D and Prototyping: AI/ML, OCR (Tesseract.js), Emerging Technologies Work Experience Software Engineering Intern May 2025 – August 2025 RI Equation LLP Remote – Contributed to the full software development lifecycle in an agile environment, from design and

implementation to testing and deployment.

- Collaborated with cross-functional teams to enhance backend services, successfully shipping code to a live production environment.
- Practiced engineering best practices including regular code reviews, unit testing, and technical documentation for new features.
- Identified and resolved performance bottlenecks in database queries, contributing to a 25% reduction in API response latency.

Projects

Scholarr: AI-Powered Docs Management System—React, Node.js, MongoDB, Tesseract.js
Aug 2024 – Sep 2024

- Developed a secure, end-to-end scholarship management platform with role-based access control (RBAC) to automate application workflows.
- Integrated an AI-powered OCR engine using Tesseract.js to automatically verify documents and detect fraud patterns, reducing manual review time.
- Built a robust backend with Node.js/Express for scalable performance, including automated email notifications and real-time status tracking.

QuickBuzz: Real-time Communication Platform—React.js, WebRTC, Firebase
Dec 2024 – Present

- Engineered a low-latency, high-availability communication platform, demonstrating skills in building scalable systems required for payment processing.
- Implemented robust error handling and fault-tolerant

peer-to-peer connection management to ensure reliable data transfer. –Collaborated with team members in an agile process to design, build, and unit test new features, ensuring high-quality code delivery.

Intelligent Data Analyst Agent (R&D PoC)—Python, Flask, REST APIs Apr 2025

- Present –Developed a Proof-of-Concept for an R&D initiative to analyze unstructured data by integrating third-party AI APIs.
- Built a Python-based backend service to parse multiple file formats, showcasing adaptability to different programming languages and emerging technologies.
- Designed and implemented a responsive React.js frontend, enabling users to interact with the backend service and visualize analytical results.

Positions of Responsibility

Team Lead, Smart India Hackathon Qualifier 2024 Birla Institute of Technology, Mesra College Level –Led a team of 6 members to design and prototype a complex project, resulting in the development of the 'Scholarr' platform concept. –Architected the initial full-stack solution, focusing on secure digital identity and transparent data transfer.

Achievements

Problem Solving

Solved 100+ problems on LeetCode, demonstrating strong analytical and problem-solving abilities. —————-Page (0) Break—————

Adaptable Computer Science student with a strong foundation in full-stack development and a passion for DevOps and AI/ML. Eager to contribute my diverse technical skills and problem-solving abilities to innovate within the digital payments ecosystem. Proficient in Java, Python, and React, with a focus on building scalable and secure solutions.

EDUCATION

Aug 2022 – May 2026

TECHNICAL SKILLS

- Programming & Frameworks:** Java, Python, JavaScript, Node.js, Express.js
Frontend Technologies: React.js, HTML, CSS
Databases: SQL (MySQL), NoSQL (MongoDB, Firebase)
DevOps & Cloud: Docker, CI/CD, Vercel, Git, REST APIs
R&D and Prototyping: AI/ML, OCR (Tesseract.js), Emerging Technologies

WORK EXPERIENCE

May 2025 – August 2025

- RI Equation LLP*
- Contributed to the full software development lifecycle, including design, implementation, testing, and deployment in an agile environment.
 - Collaborated with cross-functional teams to enhance backend services, ensuring successful code deployment to production.
 - Practiced engineering best practices, such as code reviews, unit testing, and technical documentation, to maintain high-quality standards.
 - Identified and resolved performance issues, resulting in a significant 25% reduction in API response latency.

PROJECTS

- Schollarr: AI-Powered Docs Management System** | *React, Node.js, MongoDB, Tesseract.js*
- Aug 2024 – Sep 2024
- Developed a secure scholarship management platform with RBAC, automating application workflows and enhancing data security.
 - Integrated AI-powered OCR technology to verify documents and detect fraud, reducing manual efforts and improving efficiency.
 - Built a scalable backend with Node.js/Express, including automated email notifications and real-time tracking.
- QuickBuzz: Real-time Communication Platform** | *React.js, WebRTC, Firebase*
- Dec 2024 – Present
- Engineered a low-latency, high-availability communication platform, showcasing expertise in building scalable systems.
 - Implemented robust error handling and peer-to-peer connection management for reliable data transfer.
 - Collaborated in an agile process, contributing to the design, development, and testing of new features.
- Intelligent Data Analyst Agent (R&D PoC)** | *Python, Flask, REST APIs*
- Apr 2025 – Present
- Developed a Proof-of-Concept for an R&D initiative, analyzing unstructured data using third-party AI APIs.
 - Built a Python backend service to parse various file formats, demonstrating adaptability.
 - Designed a responsive React.js frontend, enabling user interaction and visualization of analytical results.

ACHIEVEMENTS

- Problem Solving
Solved 100+ problems on LeetCode, showcasing strong analytical and problem-solving skills.
