

PROFESSIONAL SUMMARY

Adaptable Computer Science student with a strong foundation in full-stack development and a keen interest in Salesforce and Experience Cloud platforms. Eager to leverage my problem-solving skills and technical expertise, including Java, Python, and React, to contribute to Atlassian's RevOps Strategy and drive innovation in the digital payments ecosystem.

EDUCATION

Aug 2022 – May 2026

TECHNICAL SKILLS

Programming & Frameworks: Java, Python, JavaScript, Node.js, Express.js
Frontend Technologies: React.js, HTML, CSS
Databases: SQL (MySQL), NoSQL (MongoDB, Firebase)
DevOps & Cloud: Docker, CI/CD, Vercel, Git, REST APIs
R&D and Prototyping: AI/ML, OCR (Tesseract.js), Emerging Technologies

WORK EXPERIENCE

May 2025 – August 2025

RI Equation LLP

- Contributed to the full software development lifecycle, collaborating with cross-functional teams to enhance backend services and deploy code to production.
- Practiced engineering best practices, including code reviews and unit testing, ensuring high-quality deliverables.
- Identified and resolved performance issues, reducing API response latency by 25%, demonstrating a strong understanding of system optimization.

PROJECTS

Schollarr: AI-Powered Docs Management System | *React, Node.js, MongoDB, Tesseract.js*

Aug 2024 – Sep 2024

- Developed a secure scholarship management platform with RBAC, automating application workflows and integrating AI-powered OCR for document verification.
- Built a scalable backend with Node.js/Express and implemented automated email notifications and real-time tracking, showcasing skills in payment processing systems.

QuickBuzz: Real-time Communication Platform | *React.js, WebRTC, Firebase*

Dec 2024 – Present

- Engineered a low-latency communication platform, emphasizing scalability and reliability, key requirements for payment processing.
- Implemented robust error handling and peer-to-peer connection management, ensuring data integrity and security.
- Collaborated in an agile environment, contributing to high-quality code delivery and efficient feature development.

Intelligent Data Analyst Agent (R&D PoC) | *Python, Flask, REST APIs*

Apr 2025 – Present

- Developed a Proof-of-Concept to analyze unstructured data, integrating third-party AI APIs and demonstrating adaptability to different technologies.
- Built a Python backend service to parse various file formats, showcasing proficiency in data processing and analysis.
- Designed a responsive React.js frontend, enabling user interaction and visualization of analytical results.

ACHIEVEMENTS

Problem Solving
Solved 100+ problems on LeetCode, showcasing strong analytical and problem-solving skills.
