

PROFESSIONAL SUMMARY

Adaptable Computer Science student with a strong foundation in full-stack development and AI/ML, eager to contribute to the finance technology sector. Proficient in Java, Python, and React, with a proven track record of solving complex problems and delivering innovative solutions. Skilled in integrating AI features into business applications and driving technical leadership and collaboration.

EDUCATION

Aug 2022 – May 2026

TECHNICAL SKILLS

- Programming & Frameworks:** Java, Python, JavaScript, Node.js, Express.js
- Frontend Technologies:** React.js, HTML, CSS
- Databases:** SQL (MySQL), NoSQL (MongoDB, Firebase)
- DevOps & Cloud:** Docker, CI/CD, Vercel, Git, REST APIs
- R&D and Prototyping:** AI/ML, OCR (Tesseract.js), Emerging Technologies

WORK EXPERIENCE

May 2025 – August 2025

RI Equation LLP

- Contributed to the full software development lifecycle, including design, implementation, testing, and deployment in an agile environment.
- Enhanced backend services through collaboration with cross-functional teams, successfully deploying code to a live production environment.
- Practiced engineering best practices, ensuring code quality through regular reviews, unit testing, and comprehensive technical documentation.
- Identified and resolved performance bottlenecks, resulting in a significant 25% reduction in API response latency.

PROJECTS

Schollarr: AI-Powered Docs Management System | *React, Node.js, MongoDB, Tesseract.js*

Aug 2024 – Sep 2024

- Developed a secure scholarship management platform with RBAC, automating application workflows.
- Integrated AI-powered OCR for document verification and fraud detection, reducing manual review time.
- Built a scalable backend with Node.js/Express, including automated email notifications and real-time status tracking.

QuickBuzz: Real-time Communication Platform | *React.js, WebRTC, Firebase*

Dec 2024 – Present

- Engineered a low-latency, high-availability communication platform, showcasing expertise in building scalable systems.
- Implemented robust error handling and peer-to-peer connection management for reliable data transfer.
- Collaborated in an agile process, contributing to the design, development, and unit testing of new features.

Intelligent Data Analyst Agent (R&D PoC) | *Python, Flask, REST APIs*

Apr 2025 – Present

- Developed a Proof-of-Concept for analyzing unstructured data, integrating third-party AI APIs.
- Built a Python-based backend service to parse various file formats, demonstrating adaptability.
- Designed a responsive React.js frontend, enabling user interaction and visualization of analytical results.

ACHIEVEMENTS

- Problem Solving
Solved 100+ problems on LeetCode, showcasing strong analytical and problem-solving skills.
